

# Young Living Essential Oils

# SEED TO SEAL

[OurDailyDrop.com](http://OurDailyDrop.com)

## SEED

Powerful, effective essential oils come from seeds and plants that are verified for their potential to produce high-quality essential oils. Our own experts partner with university researchers to evaluate this potential. The seeds we use are selected for their scientifically proven ability to become plants with the highest possible levels of bioactive compounds.

## CULTIVATE

Young Living farms, located around the globe, are dedicated to perfecting our responsible and sustainable growing and harvesting methods. Our experts travel the world visiting our co-op farms to verify that their growing and cultivating processes match our high standards. These operations provide an ongoing source for essential oils that meet Young Living's demanding commitment to quality.

## DISTILL

Combining ancient and modern techniques, Young Living is recognized as an innovator in essential oil distillation. We use a gentle, proprietary technique for steam extracting essential oils and preserving their precious constituents. We use cold pressing and resin tapping methods for select oils.

## TEST

Unwavering standards! Young Living never accepts diluted, cut, or adulterated oils. To guarantee consistent, verifiable quality, they are tested in Young Living's own internal labs, as well as in third-party facilities. Our testing methods ensure our oils meet stringent specifications, exceed international standards, and contain optimal levels of natural bioactive compounds.

## SEAL

Young Living completes the Seed to Seal process in its 107,000-square-foot facility in Spanish Fork, Utah. Using state-of-the-art equipment, each essential oil is carefully bottled and labeled before being shipped to members worldwide

## YOUNG LIVING FARMS

Inspired by the fields, forests, and jungles that surround our pristine farms, Gary Young continues to discover new botanicals and essential oils, helping us bring more of nature's greatest gifts to people throughout the world.

**Current Young Living Farms:** Mona, Utah, U.S. • St. Maries, Idaho  
British Columbia, Canada • Salalah, Oman • Highland Flats, Idaho  
Guayaquil, Ecuador • Croatia • Simiane, France • Iquitos, Peru
